

FAUSTI

- Model :** CONRAD SLUG GUN
- Caliber:** 12 ga
- Barrel:** Over & Under - 22 inch length
- Chokes:** Top barrel- Modified, Lower barrel- Improved Cyl.
- Sights:** Adjustable Fibre Optic
- Engravings:** Custom - Warthog on sides, Bushpig Underneath (attached)

History:

The engineers at Brescia, Italy based Fausti Arms factory, in conjunction with their Northriding based distributors in South Africa - Entramarc (Pty) Ltd., have very recently identified the need for a heavy duty, quick and easy to use back-up gun for thick bushveld and riverine conditions when hunting and or following up on wounded and dangerous game such as Warthog, Bushpig and Bushbuck. The model Conrad Slug Gun meets all the required criteria perfectly. With its short barrel length, this shotgun comes up extremely quickly and its fast trigger pull allows for two shots to be fired in quick succession should the need arise. The bright, light sensitive Fiber Optic sighting system is ideal for low light conditions. This model has been specifically designed for the use of Slugs (Fixed Open chokes in both barrels) but can also fire larger or smaller shot pellets in this situation as well, giving the hunter a wider selection of ammunition which can be used for different applications.
